

## PROFILE

I am a Full Stack Developer and a student of a university degree in programming, which aims to enter the world of IT.

My purpose is to develop experience while I advance in my career and grow in the technological field.

Looking for new challenges and techniques to learn, knowledge lover and good teamwork, always looking to be better than yesterday.

**Soft skills:** I consider myself a responsible, proactive and empathetic person who likes to collaborate with the team.

## PROJECTS

### CONTACT BOOK(CRUD)

<https://contact-crud.vercel.app>

#### Front-end:

- Web app created using NextJS for server side rendering and tailwindcss for responsiveness. It allows us to add, change and delete contacts.

#### Back-end:

- Api that allows to interact with a MySQL database to create, delete, update and read contacts. Made with NodeJS, ExpressJS, Sequelize, MySQL, Joi.
